

Product Safety Data Sheet

Product Name: Aqua Control C4100 Garden Irrigation Programmer with LCD Screen

Brand: Aqua Control

1. General Product Description:

The Aqua Control C4100 is a digital irrigation programmer designed to automate garden watering. Equipped with an LCD screen, it allows for intuitive and accessible programming, capable of managing up to 8 daily starts with 15 different settings. Its functionality provides an efficient solution for the maintenance of green areas, optimizing water consumption and ensuring proper care of plants.

2. Manufacturing Materials:

The Aqua Control C4100 irrigation programmer is made with high-quality components to ensure durability and resistance. Its main materials include:

- **Plastic:** For the external casing, providing lightness and resistance to adverse weather conditions.
- **Metal:** In elements like the filter, ensuring effective and long-lasting filtration.

All materials have been selected considering their impact on safety and the environment, complying with relevant regulations.

3. Instructions for Use:

- Install the programmer on a 3/4" or 1" tap, ensuring it is firmly connected.
- Insert 1 9-volt alkaline battery (not included) in the designated compartment.
- Program the device using the removable front panel and the LCD screen. Up to 8 daily starts can be set, with 15 settings available.
- Ensure that the water pressure is between 1 bar (minimum) and 7 bar (maximum) for correct operation.

Precautions: Do not expose the device to extreme temperatures or direct sunlight for long periods. Ensure compatibility of the tap and connections to avoid leaks.

4. Maintenance and Care:

- Regularly clean the metal filter to avoid obstructions.
- Store the programmer in a dry and protected place during inactive months.
- Periodically check the battery and replace it when necessary to avoid malfunctions.

5. Safety Measures:

- Avoid direct contact of the device with water to prevent electrical damage.
- Do not disassemble or modify the product, as this could affect its operation and safety.
- When the battery is low, the valve will automatically close to avoid wasting water; replace the battery as soon as possible.

6. Disposal at End of Life:

The Aqua Control C4100 irrigation programmer should be disposed of responsibly. We recommend taking it to an appropriate recycling center where materials can be properly processed, following local recycling and waste disposal regulations.

Note: This datasheet has been prepared following the guidelines of the GPSR (General Product Safety Regulation) to ensure safe and responsible use of the product.
