

Product Overview

The CROSOFMI Automatic Irrigation Programmer is an innovative device designed to facilitate and automate garden watering. This irrigation timer is characterized by its high water resistance (IPX5), rain delay feature, manual watering mode, and child lock, making it an ideal solution for efficiently and safely keeping your garden flourishing.

Manufacturing Materials

This irrigation programmer is made from high-quality materials that ensure durability and reliability. The plastic components are robust and resistant, specially designed to withstand various outdoor climatic conditions. The metal parts are treated to prevent corrosion and ensure a long product life. All materials comply with applicable safety and health regulations.

Instructions for Use

To install the CROSOFMI Automatic Irrigation Programmer, follow these steps:

1. Connect the programmer to your garden tap.
2. Make sure all connections are secure to prevent leaks.
3. Program the watering schedules according to your garden's needs, using the buttons on the front panel.
4. Activate it and secure the child lock to prevent unwanted adjustments.

Caution: Do not expose the device to extremely low temperatures to prevent freeze damage.

Maintenance and Care

Keep the irrigation programmer clean, free of dust and dirt. Store the device in a dry, protected place when not in use. Regularly check connections to ensure they are tight and leak-free. Do not use harsh chemicals to clean the programmer.

Safety Measures

- Avoid exposing the programmer to extreme weather conditions.
- Do not submerge the device in water, even if it is water-resistant.
- Keep it out of reach of children when not secured with the child lock.
- Disconnect it before performing maintenance or cleaning.

End-of-Life Disposal

At the end of its useful life, the CROSOFMI Automatic Irrigation Programmer should be disposed of responsibly. Separate its components according to the materials (plastic, metal) to facilitate recycling. Consult with local authorities about appropriate recycling programs or designated collection points for electronic devices.
