

Product Overview

The DEWINNER Automatic Garden Sprinkler is an innovative device designed to automate the watering of green areas in both home gardens and larger spaces. This 360° rotating sprinkler offers an efficient and adaptable watering solution, thanks to its ability to adjust coverage by selecting nozzles and the orientation of the sprinkler arms. Its ease of use makes it an essential tool for maintaining well-watered gardens, patios, and farms, optimizing water consumption, and promoting the healthy growth of plants and grass.

Manufacturing Materials

This product is mainly made of high-quality ABS, a plastic known for its resistance and durability. The strength of this material ensures that the sprinkler can withstand weather variations and frequent use without degrading. In addition, the incorporated metal components have surface treatments to prevent corrosion, which prolongs the sprinkler's lifespan. The combination of these materials ensures both lightness and robustness, facilitating its handling and movement.

Usage Instructions

To install the DEWINNER Automatic Garden Sprinkler, follow these steps: 1. Connect the sprinkler to the water supply using the provided joint connectors. 2. Adjust the sprinkler arms according to the size of the area to be watered: use 5 holes for small gardens or 3 holes for larger areas. 3. Open the water supply tap at normal domestic water pressure to initiate automatic rotary spraying. 4. For extensive areas, connect two or three DEWINNER sprinklers in series to completely cover the desired area.

It is important to ensure that the device is properly fixed to the ground to avoid unwanted movements during operation.

Maintenance and Care

To ensure efficiency and prolong the lifespan of the DEWINNER sprinkler, it is crucial to perform regular maintenance. Clean the filters and nozzles from time to time to prevent clogging. Store the device in a dry place protected from the weather when not in use. Periodically check the connections and replace them in case of wear or damage.

Safety Measures

- Avoid direct contact with pressurized water to prevent accidents.
- Do not allow children to handle the sprinkler without supervision.
- Disconnect the sprinkler from the water supply when not in use or when performing maintenance.
- Regularly check the condition of the sprinkler and its connections to prevent leaks or breaks that may result in water waste or material damage.

End-of-Life Disposition

When the DEWINNER sprinkler is no longer usable, it is recommended to dismantle it and separate the components according to material type. Plastic and metal elements should be recycled separately, according to local waste management regulations. Avoid disposing of the sprinkler as common waste, always opt for options that
