

## Product Overview

The Aqua Control C4099O is an automatic irrigation controller designed for gardens, compatible with all types of faucets. This device aims to facilitate the automation of irrigation, allowing users to set specific frequencies and durations for watering their plants. With this program, it is possible to adjust the watering to activate every 1, 2, 3, 4, 5, 6, 8, 12, 24, 48, 72 hours, or even once a week, with durations ranging from 1 minute up to 120 minutes. This customization helps users to keep their gardens watered efficiently, saving water and time.

## Manufacturing Materials

This irrigation controller is made mainly of durable plastics and metallic components for its connectors and internal valves, ensuring a long lifespan and resistance to wear typical of outdoor use. Special attention has been paid to the selection of materials that not only guarantee the product's durability but also its safety in contact with water and exposure to the sun.

## Instructions for Use

To install and start using the Aqua Control C4099O, follow these steps:

1. Make sure the faucet is closed before installing the programmer.
2. Connect the programmer to the faucet using the connection thread. Tighten firmly to avoid leaks.
3. Insert two 1.5 V AAA alkaline batteries into the waterproof compartment, ensuring the cover is closed tightly.
4. Program the watering by selecting the desired frequency and duration using the control buttons.
5. Use the manual open and close function to water outside the programmed times if necessary.
6. Activate the delay function to postpone the start of watering if necessary.

Remember not to exceed the maximum operating pressure of 8 bar, even though the device can open at 0 bar for use in water tanks.

## Maintenance and Care

To ensure optimal operation of the irrigation programmer:

- Regularly clean the casing with a dry cloth to prevent the accumulation of dust and dirt.
- Ensure that the batteries are replaced when necessary to avoid failures in the programming mechanism.
- Do not expose the device to extreme conditions such as freezing, high temperatures or direct sunlight for prolonged periods.
- Store the programmer in a dry, cool place out of season.

## Safety Measures

- Keep the device out of reach of children.
- Avoid opening the battery compartment in damp environments.
- Do not attempt to repair or alter the irrigation programmer on your own. Contact an authorized service center in case of failure.
- Disconnect the device from the faucet during electrical storms to prevent damage.

## Disposal at the End of Its Useful Life

Once the Aqua Control C4099O has reached the end of its useful life, do not throw it away with household trash. Take it to a recycling point.
