

Product Overview

The Aqua Control C4099O is an automatic irrigation timer designed to facilitate efficient and convenient garden watering. This device allows users to automate watering with a wide range of frequencies and durations, adapting to the specific needs of their garden. Packaged in a cardboard box, which is more environmentally friendly, this timer is compatible with all types of faucets and operates correctly with a minimum water pressure of 1 bar and a maximum of 8. However, it is capable of opening at 0 bar, allowing its use in water reservoirs.

Manufacturing Materials

The Aqua Control C4099O is made with high-quality materials, including plastic and metal parts. These materials not only provide excellent durability but also ensure user safety during operation. The choice of these materials contributes to the robustness of the irrigation timer, ensuring a long lifespan and resistance to various weather conditions and usage.

Instructions for Use

To install and program the Aqua Control C4099O, follow the steps below: 1. Make sure the faucet is closed before installing the timer. 2. Connect the timer to the faucet, ensuring it is securely attached to prevent leaks. 3. Insert 2 AAA alkaline batteries of 1.5v into the watertight compartment, making sure to close the lid properly to prevent leakage. 4. Program the device according to the desired frequency and duration for watering your garden. 5. If you wish to delay the start of the watering, use the delay function adjusting it from 1 to 12 hours.

Bear in mind basic precautions, such as not exposing the device to direct rain or intense sun to avoid damage.

Maintenance and Care

To ensure the good condition and operation of the irrigation timer, follow these recommendations: - Regularly clean the device with a dry cloth, especially after each watering season. - Store the timer in a dry, protected place when not in use. - Periodically check the battery compartment to ensure there are no leaks or corrosion.

Safety Measures

Please consider the following safety measures when using the irrigation timer: - Do not handle the device with wet hands or while it is connected to the faucet. - Avoid rough handling that could damage the timer's components. - Do not attempt to open or repair the device on your own. In case of any failure, consult with a professional.

Disposal at the End of Its Life Span

Trademark: Aqua Control
When the Aqua Control C4099O irrigation timer reaches the end of its life span, do not dispose of it with regular household waste. Find out about recycling options in your area for responsible disposal of electronic and plastic components. Proper disposal contributes to environmental protection and material recycling.
